

Tunnel Scanner TM-270

Features

➤ Wide range scanning

Both single line and double lines are applicable to scan.

➤ Various speed for measurement

Hand-pushing trolley (Up to 20km/h).

➤ Easy to assemble, run and remove within limited working time.

Easy to hand carry the unit and short-time assemble it on site.

➤ High definition image

High definition camera and encoder capture high resolution wall image with various speed.

➤ Excellent analysis software

A lot of know-how inside of our “Kuraves-Actis” software contribute the measurement of crack and other defect, then create deficiency map.

Unit system

* Equipment highlighted in red should be prepared by customer.

Specification

	Tunnel Scanning System TM-270	
Camera device	High resolution color line camera	
Camera (TTL300 degrees)	7	
Lighting system	LED Light	
Transversal resolution	1mm/pix	
Travel direction resolution	1mm/pix	
Survey speed	Walking speed (Up to 20 km/h) *	
Acquisition	Trigger mode (Encoder) *Speed sensor mode is available as an option	
Power	Maximum 1.7kW * *Vary depend on the configuration	
Tunnel shape	Maximum tunnel height by approx. 7.5m	

Example of use

Single-track

- * 7 pcs cameras
(300 degree photographing)

Multiple-track

- * 4 pcs cameras
(180 degree photographing)

Processing Flow

1. Camera Adjustment

Pre-work

2. Assemble

3. Taking photo

4. Bring data to the office

5. Data Analysis

Office

Span image

- Long correction
- Multiple image correction
- Color correction
- Output image of span unit

Abnormality analysis

- Extraction and drawing the crack
- CAD output the damage data (Crack location map)

Deficiency Map(Lined image)

- Tilt correction
- Deformation
- Image synthesis
- Output the living image

Assemble

Working time 30min

5 STEP !

On site inspection

Scanning Software

The screenshot displays the scanning software interface. At the top, the date and time are 2018/11/28 15:43:13, and the version is Ver 1.0β. The main view shows a blue arc representing a scan area, with a distance of 37m and a 0-degree angle. Navigation controls include left and right arrows and a 'Replay' button. A table below the main view shows the status of seven cameras:

CAM1	CAM2	CAM3	CAM4
Total=37250	Total=37250	Total=37250	Total=37250
CAM5	CAM6	CAM7	
Total=37250	Total=37250	Disconnect	

Below this table, a 'Camera3 Right Side' view is shown, with a 'Close' button. To the left, a control panel includes an 'OVERLAP' button, navigation arrows, and a grid of border selection options:

Border1	Border2
CAM1 CAM2	CAM2 CAM3
Border3	Border4
CAM3 CAM4	CAM4 CAM5
Border5	None
CAM5 CAM6	
None	

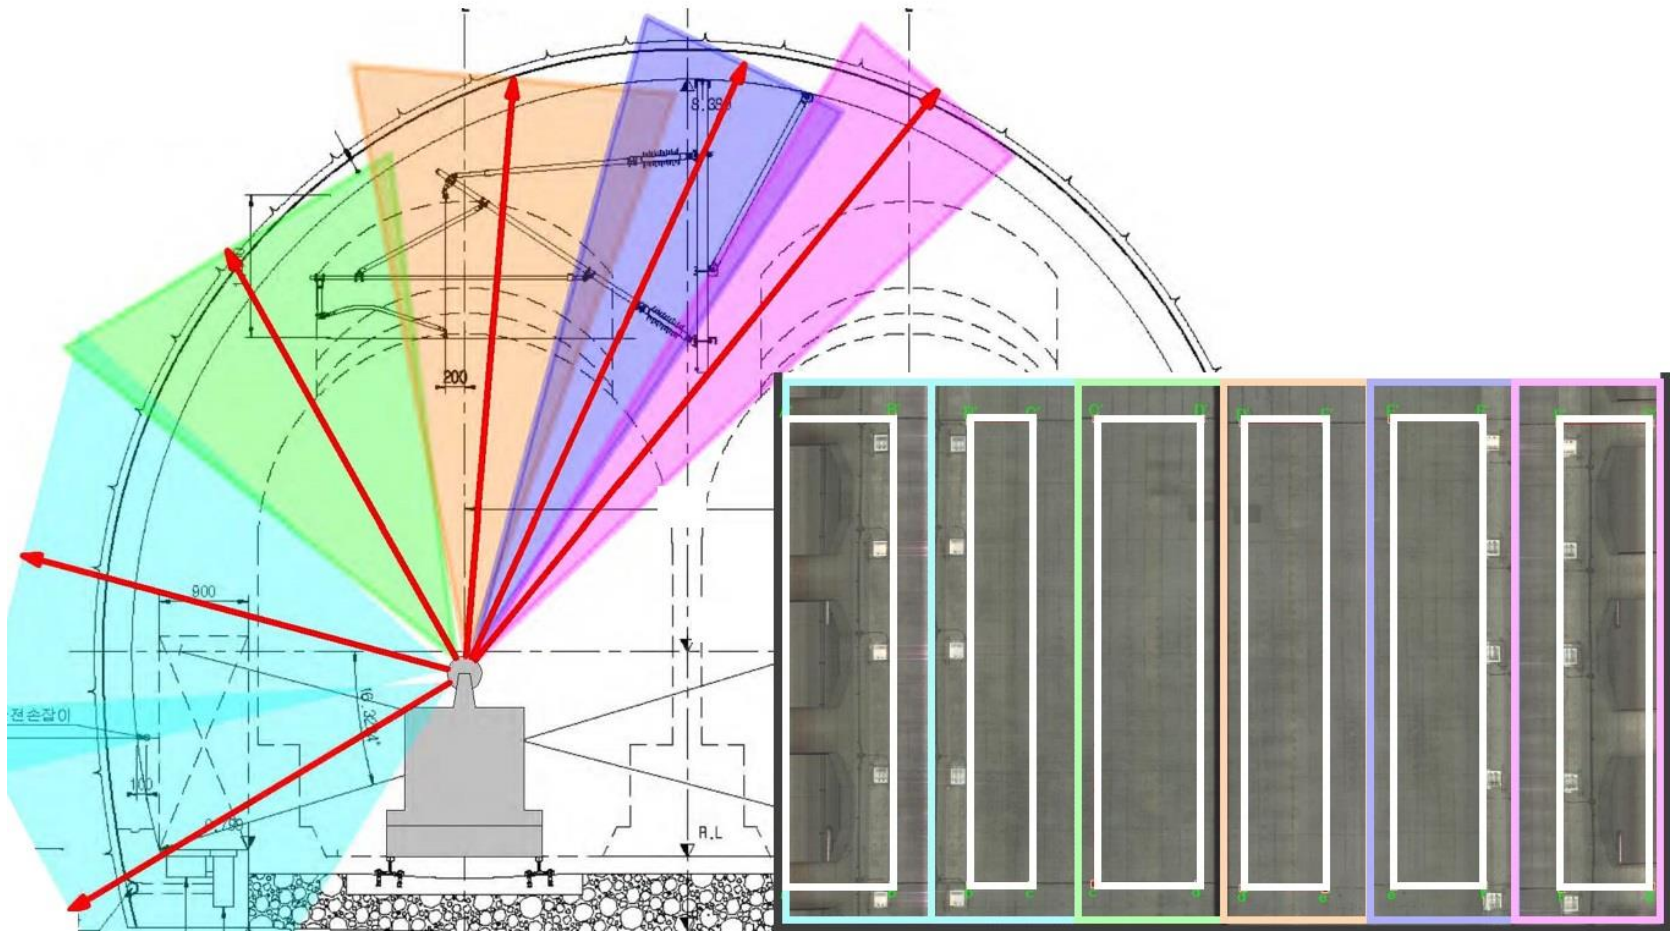

Easy to confirm the overlap.

Scanned data

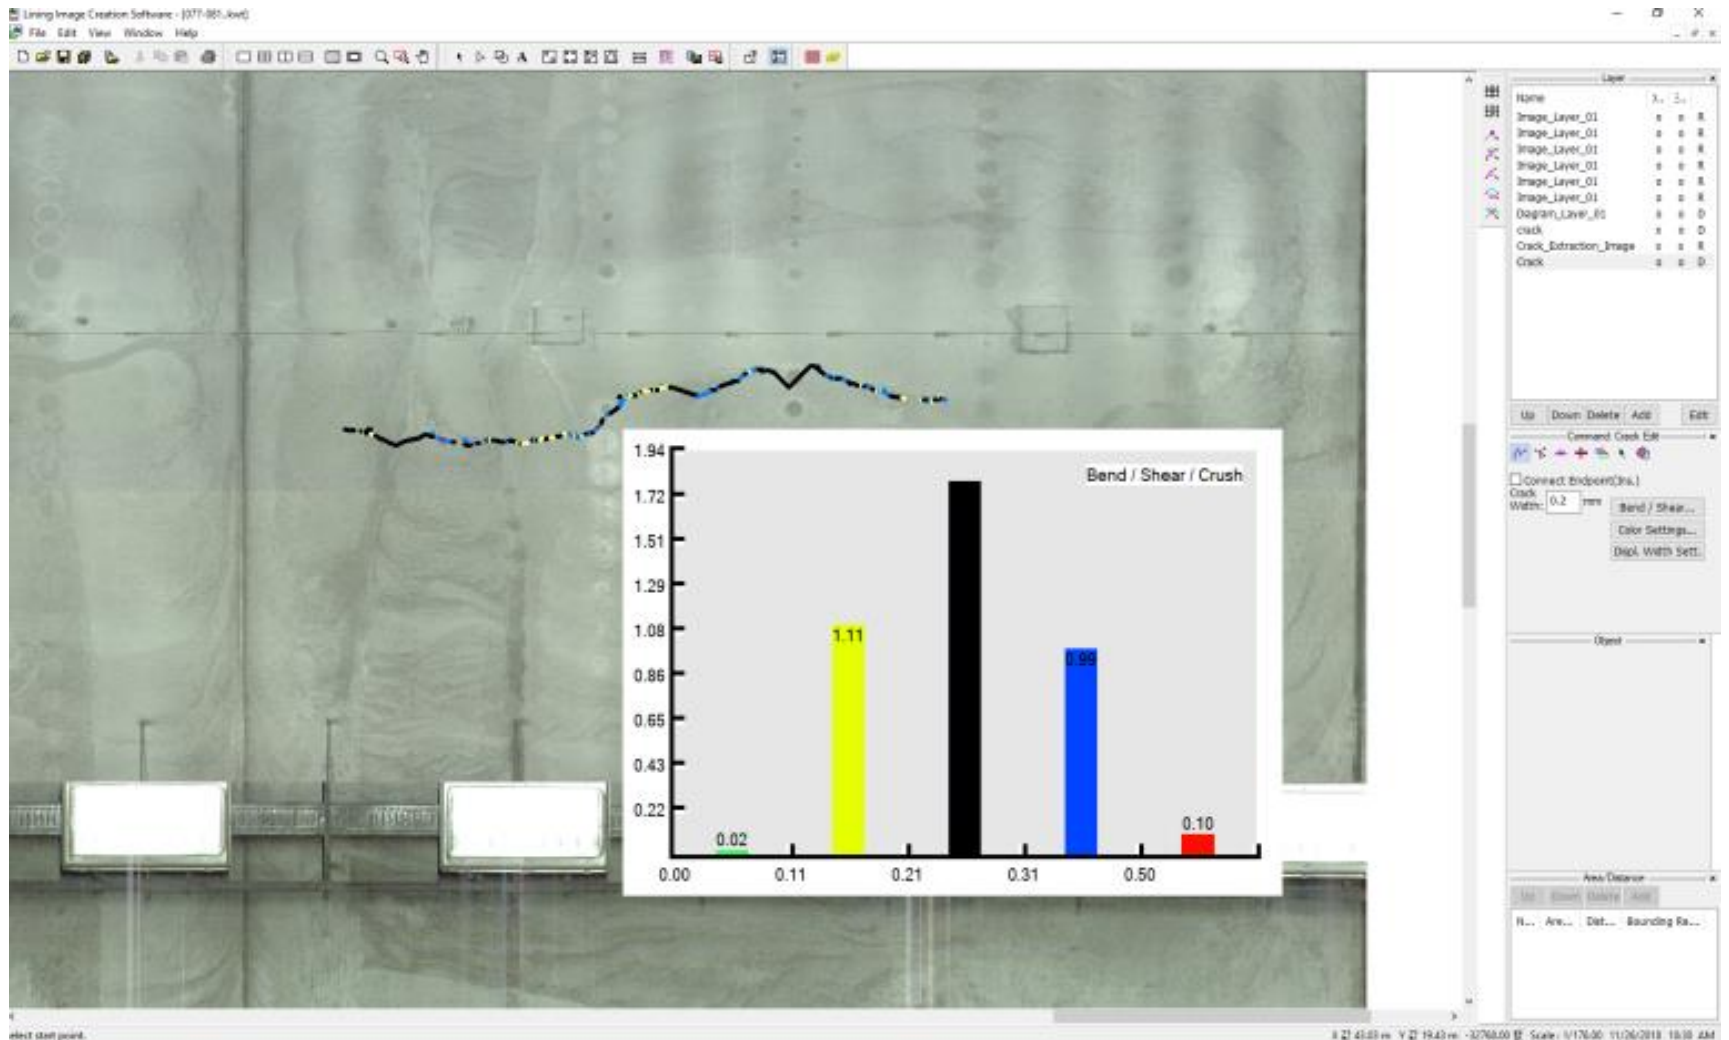

Available for taking photo 0.1mm crack !
